SCHUTTE-BUFFALO HAMMERMILL

America's fastest growing hammermill company

The **"Liberator"** from
Schutte-Buffalo
Hammermill

Designed specifically for the carpet recycling industry,
the lab & field tested **"Liberator"** is the proven superior choice.

SchutteBuffalo
HAMMERMILL

FEATURES

Carpet is not free flowing and therefore requires unique handling. The proven, time-tested technology built into every "Liberator" will allow you to achieve the highest degree of fiber-backing liberation.

No machine produces a cleaner fiber than the "Liberator."

THE PROVEN SUPERIOR CHOICE

With over ten years of experience in the carpet recycling arena, our state-of-the-art "Liberator" combines the proper hammer, screen, and liner design that results in the most efficient processing of this difficult material. We even control dwell time within the "Liberator" to achieve your goals!

At Schutte-Buffalo Hammermill, we can provide a complete and fully integrated system by working closely with our associates in the shredding, and material handling fields... from whole carpet in, to clean fiber out... efficiently, economically, and safely.

Available in several sizes to match your hourly production goals, Schutte-Buffalo Hammermill equipment is the heaviest, most rugged on the market today, and it's designed to run 24-7. Send or bring your most challenging material to our lab and we'll conduct a FREE TEST to prove our equipment's capabilities.

The "Liberator" is available in four standard models

Model	Horsepower (HP)	Processing Capacity (lbs/hr.)	Dimensions**
1580	150	2,000-2,500	94" x 91" x 86.5" tall
1590	200	3,000-3,500	123" x 91" x 86.5" tall
15100	300	4,000-5,000	136" x 91" x 86.5" tall
15200	400	5,000-6,000	148" x 91" x 86.5" tall

* Actual capacity based on size of pre-shredded in-feed material, screen size employed, and pneumatic discharge system efficiency.

** Dimensions are for mill only and do not include any support structures or peripheral equipment.

Call 1-800-4GRIND4 or visit www.hammermills.com for more information on the 15 Series "Liberator."
