Ruggedly built to outperform and outlast its competitors

High capacity, single rotor, hammer and comb design, ideal for most de-agglomeration applications. Ranging in sizes from laboratory scale to heavy duty industrial, and in carbon steel, stainless steel or food grade stainless steel, the BD Series Lump Breaker is available with standard or customized hammer and comb design, tailored to maximize efficiency for individual applications. Various rotor speeds are available to optimize performance on a variety of materials reducing dry and/or hardened agglomerates to a flowable end product.

BD Series Lump Breaker featuring optional tungsten carbide coated hammers for processing abrasive materials

Applications

- Chemicals
- Food Products
- Soda Ash
- Sugar
- Cement
- Resins
- Powder Solubility Improvement
- In-line bulk-solids

Key Features

- High capacity, low energy consumption
- Rugged carbon or stainless steel construction
- Low maintenance, easy to service, readily available parts
- Many grinding rotor configurations available
- V-Belt or gearbox driven
- Hammer and comb arrangement configured to suit application
